

Canon Department ID Driver Settings

Select the start menu, then right click on the printer, select Printer Properties.

Select the Device Settings tab from the top. If everything is grayed out go back to the General tab and check is there is a change settings button at the button. If it is there select it and you should then have access. Check mark the Use Department ID Management box.

Select the Settings button. Check mark the Allow PIN Setting button. Fill in the Department ID and PIN, select Verify, then select OK. Select Apply, this is now part of your defaults. If you do not enter a PIN when you Copy, leave the PIN field blank.
